

Chennai Mathematical Institute

INFORMATION RETRIEVAL DEADLINE: SEP 02, 2020 11:59 PM IST. MAX MARKS: 2.

Prepare a video on the topic - "**The Power of Indexing in Information Retrieval**". You must adhere to the following rules:

1. Video should be of minimum 3 minutes and maximum 5 minutes in length.
2. It should feel like a group discussion. At a minimum, 3 people (to a max of four) must be involved. This is a team activity.
3. You should not talk to slides. You may use occasional graphic or one or two slides just to explain some idea. However, the talk should not be slide driven.
4. Video need not be extremely professional. However, maintain sufficient decorum so that the video can be widely circulated (say, on linkedin, youtube and to your next batch to watch). If you would not like your video to be circulated, please mention that explicitly while submitting. Circulating it on platforms like linkedin increases the chance of a recruiter or a manager watching it and approaching you for a job.
5. All the participating students should appear on the video. Do not disclose any information (like your roll number, email, etc) other than your name in the video.
6. Before starting the discussion, introduce yourself, and talk about the course.
7. At the end of the video, acknowledge the references and sources from where you picked up the material to discuss.
8. Keep the video primarily educational in nature. Yet, add some element of fun to engage the audience.

One video will be selected as the best. All the makers of the winning video will get 2 bonus marks each. No marks for the rest of the groups. If your instructor is not satisfied with the content, he may not select any video.

The bonus marks cannot take your overall score beyond 100%. It can be added to any graded component till the maximum allowed marks are reached for that component. Bonus tasks are purely optional.
